

NATURE IS EVERYWHERE:

Draw & Sing Along

Watch the music video, then use this page to sing along!

What do you think Elmo might see and closely observe on this sidewalk? Draw ants, fallen leaves, sticks, acorns, weeds growing through the cracks, or anything else you like. Next time you're outside, look down and notice nature!

Nature is everywhere, from the sky down to the ground.
Nature is everywhere, you just have to look around.

Listen close and you can hear nature on our street.
Chirping birds, whooshing wind, a buzzing bumblebee.
Weeds grow in a sidewalk crack, worms hide under a rock.
When you look close, you can see so much nature on our block.

Nature is everywhere, from the sky down to the ground.
Nature is everywhere, you just have to look around.

Feel this rough and scratchy bark. Smooth acorn, crunchy leaf!
There's a whole world to explore on one city tree!
The rain that makes big puddles, the mud that sticks to stinky shoes
Nature is really beautiful. And yeah, messy too!

Nature is everywhere, from the sky down to the ground.
Nature is everywhere, you just have to look around.
